

Faster Speed, Fewer Log Ons The New Seton Family Access

Seton Family Access, our free wireless Internet access available to guest and patients, is expanding to meet the needs of associates, physician partners, nursing students and vendors. Beginning July 13, Seton Family Access will recognize *Active Directory* (AD) accounts.

What does this change mean to you? By entering your AD account credentials, you'll receive a faster Internet connection than our guests and patients. Plus, Seton Family Access will remember your credentials for 30 days, so you won't need to keep logging back in. Connection will be automatic!

To take advantage of these improvements, simply select the **“I am a Staff Member”** option on the new Seton Family Access log in screen. You'll be prompted to enter your AD credentials.

AD accounts (the username and password you use to check your Seton e-mail) are issued to every associate hired by Seton and to all credentialed physicians.

If you are a physician and have not used your AD account in more than 90 days, please call the Seton ServiceDesk at 324-1675 to have your account reset.

If you are a vendor or contractor and would like to obtain an AD account, your Seton project sponsor will need to submit a SHOP request.
