

Improved procedures for the *Medication upon Admission* list

In response to physician feedback about the quality of information included in a patient's *Medication upon Admission* list, Seton has taken action and changed the document.

Now, *Medication upon Admission* lists will include the:

- **Name of the clinician who last updated the list**
- **Title of the clinician (i.e., RN, Pharmacy Tech, etc.)**
- **Date and time the information was entered or verified**

When an error in the home medication list is identified (such as dose or name of drug), write an order in the New Orders section at the bottom of the form to instruct Pharmacy to correct the home medication list.

Seton is always interested in physician ideas for making the delivery of care safer and raising physician confidence in the quality of information provided. If you would like to provide any feedback, please contact Pat Garrett at (512) 324-7356 or PGarrett@seton.org; or Colleen Mullins at (512) 324-5712 or CMullins@seton.org.
