

# Compass

## WHAT IS COMPASS?

COMPASS is a single electronic health record (EHR) which organizes patient-centric information from different caregivers, departments and software programs into one universal patient chart. COMPASS puts the most up-to-date patient information right at your fingertips whether you are in the hospital, your office, or even at home.

## SPECIALIZED SOFTWARE COMPONENTS

COMPASS is a *suite* of clinical foundation software, with specialized applications for different departments.

*PowerChart* – General Medicine

*FirstNet* – Emergency Department

*INet* – Critical Care

*SurgiNet* – Surgical Services

*MessageCenter* – Sign Medical Records Online

*PharmNet* – Pharmacy and Meds Administration

*COMPASS Scheduling* – Network Scheduling System

*Charge Services* – Charge Capture
