

LEXI-COMP Online

It's quick, safe, convenient and practical. It's LEXI-COMP -- the new pharmaceutical desktop reference accessible through COMPASS.

LEXI-COMP is a convenient and practical way for Seton healthcare professionals to learn about a medication's action, dosage range, potential allergies and contraindications – allowing you to quickly, safely and confidently administer medications to your patients.

Access LEXI-COMP through the COMPASS application screen you use to access COMPASS PowerChart. The LEXI-COMP icon will appear as:

No username or password is required. To learn to use this tool most efficiently, located on the first page are links for Training and Support:

The screenshot shows the Seton Family of Hospitals website. At the top center is the Seton logo, which consists of a blue circle containing a white cross, followed by the word "Seton" in a bold, black font and "Family of Hospitals" in a smaller, black font below it. To the left of the Seton logo is a small, square icon with a teal background and white text that reads "LEXI-COMP ON-HAND". To the right of this icon is a blue link that says "Click Here to Access your PDA Software". Below the logo and icon is a blue horizontal bar with the text "Clinical Links" in white. Underneath this bar are two columns of links. The left column contains: "New Drugs", "ASHP Drug Shortages", and "National Library of Medicine". The right column contains: "Orange Book", "FDA Recalls", and "Dangerous Abbreviations". Below the "Clinical Links" bar is another blue horizontal bar with the text "Training & Support" in white. Underneath this bar are two columns of links. The left column contains: "Training" and "Product Feedback/Suggestions". The right column contains: "Contact Support/Questions?" and "Lexi-Comp ONLINE Updates". A red rectangular box highlights the "Training & Support" section.
