## Cerner Mobile Applications Access

### Summary

- Providers can now access Cerner applications on their mobile devices.
- Once the desired applications are downloaded, providers will need to request an access code.
- If included in the request, multiple devices can be activated using the same code.

### Application Download

- Available applications
  - PowerChart Touch - a mobile version of PowerChart. Providers can review patient results and information, place single orders, and create notes from most Dyn Doc templates
  - Message Center - Manage messages, cosign orders, results, and documents from a mobile device
  - Instanote - create free-text clinical notes on a mobile device and save to a patient's chart
  - Camera Capture - Can be used to capture and save wound care or surgical photos to the patient chart
- Use the QR codes below or search the appropriate app store for Cerner. Install the desired apps

#### Apple Devices

PowerChart Touch	Message Center	Instanote	Camera Capture
			

#### Android Devices

PowerChart Touch	Message Center	Instanote	Camera Capture
			

## Request an Access Code

- Codes can be obtained at on-site events, online in COMPASS or at <http://doctors.seton.net/compass/cerner-mobile-apps>, or by contacting the Clinical Informatics Support Line, M-F 8am-4pm: (512) 537-8179
- Online Requests:

<p>Click the PC Touch button on the COMPASS toolbar or the Request Mobile Access link on Doctor Link</p>	
<p>Sign in using network credentials</p>	
<p>Click Request Access button on the top right corner</p>	
<p>List the device(s) to be activated then click Submit Request</p>	
<p>Within 1-2 business days an email will be received stating that an access code has been generated. Click the link in the email and log in using network credentials to obtain the access code.</p>	

- Once an access code is received, open any of the Cerner apps on the device
- Enter the access code. Once entered, the code is not needed for the other apps

- Login using network credentials
