

Diagnosis and Problems Favorites

Effective: October 1, 2015

Positions Affected: All Providers (Physicians, PA's, and APN's)

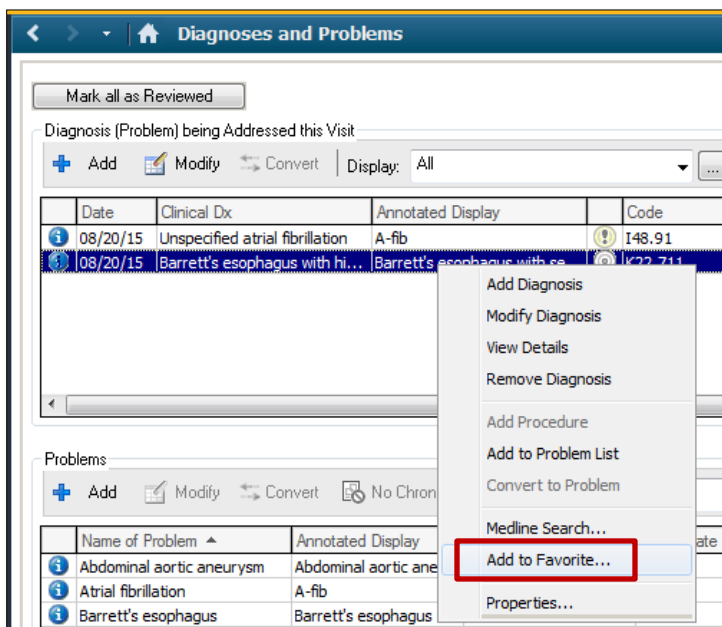

Rationale:

- Favorite Folders for **Diagnoses** will be wiped clean after the switch from ICD-9 to ICD-10 on October 1st.
- Favorites Folders will have to be rebuilt beginning 10/1 with new ICD-10 diagnoses

Summary Process Steps:

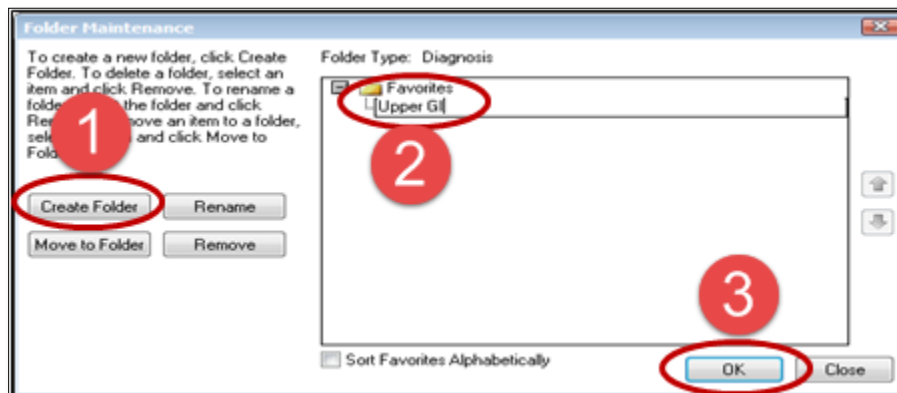

Creating a Favorites Folder

- Right-click on the desired diagnosis/problem after it has been entered on the patient's chart
- Select "Add to Favorites"

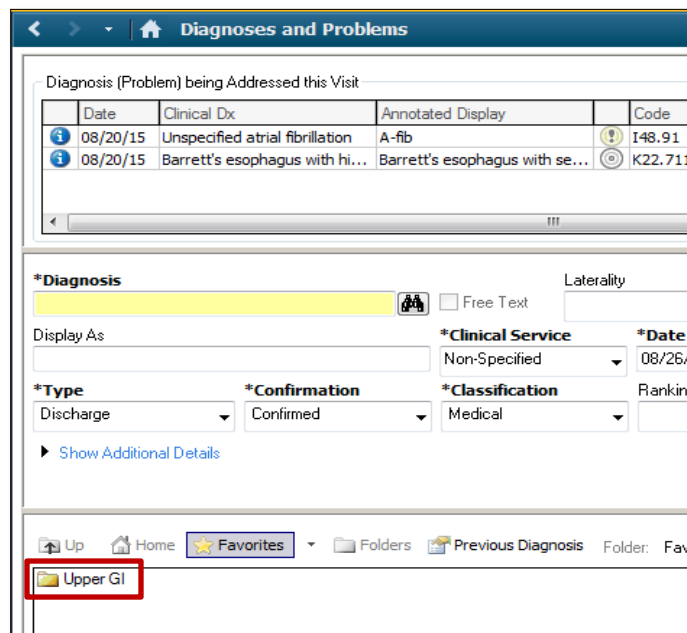

- Click **Create Folder**
- Create a Folder name and click **OK**

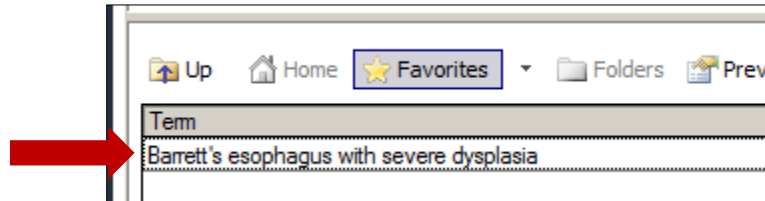

Locating a saved Favorites Folder

- Click on the **+ Add** from either Diagnosis or Problems
- Click on the needed Favorites Folder to find the diagnosis/problem

- Click on the appropriate diagnosis/problem to add to the patient's chart
