

ALTERED MENTAL STATUS (AMS)

ICD-9 DESCRIPTION	ICD-10 DESCRIPTION
<p>INAPPROPRIATE DOCUMENTATION EXAMPLE</p>	<p>APPROPRIATE DOCUMENTATION EXAMPLE</p>
<p>Diagnosis: 780.97 Altered mental status, unspecified</p> <p>HPI: 77 year old male with PMH dementia and bipolar disorder, presented with symptoms of altered mental status. Suspect etiology is multifactorial. On lithium. Serum Na+ 124 mmol/L.</p> <p>Associated symptoms: Recent weight loss, increased lethargy and confusion with agitation at times.</p> <p>Pertinent negatives: No known falls or head trauma.</p> <p>Compliance with medication: Compliant.</p> <p>Compliance with lifestyle: Compliant</p> <p>Assessment/Plan: Altered mental status. Admit for work-up. Repeat chemistry profile, CBC. Obtain CT head, lithium level, and geriatric consult. Start IV NS 100 cc/hr.</p> <div data-bbox="155 943 959 1018" style="background-color: red; color: white; padding: 5px; text-align: center;"> <p>↑ Concept(s) requirement not met: unspecified AMS, not associated with underlying etiology, no acuity</p> </div>	<p>Diagnosis: E87.1 Altered mental status due to Hyponatremia</p> <p>HPI: 77 year old male with PMH dementia and bipolar disorder, presented with symptoms of altered mental status. Suspect AMS due to hyponatremia, possibly drug-related (lithium) associated with recent weight loss.</p> <p>Associated symptoms: Increased lethargy and confusion with agitation at times.</p> <p>Pertinent negatives: No known falls or head trauma.</p> <p>Compliance with medication: Compliant.</p> <p>Compliance with lifestyle: Compliant</p> <p>Assessment/Plan: Suspect hyponatremia due to increased lithium level. R/O SIADH. Patient is agitated and combative at times, likely representing acute delirium superimposed upon existing dementia. Requires safety precautions. IV NS bolus, then 100 cc/hr. Repeat chemistry profile, CBC. Obtain CT head, lithium level, and geriatric consult.</p> <div data-bbox="1094 943 1976 1018" style="background-color: green; color: white; padding: 5px; text-align: center;"> <p>↑ Concept(s) requirement met: diagnosis specify, underlying cause, and acuity</p> </div>
